development company

BEE123 FOR VERIFICATION AGENCIES

End-to-end software designed specifically for verification agencies from South Africa's leading developer of B-BBEE technology

Running a Verification Agency is a complex operation. Compounding this, existing industry software tends to be unsophisticated and is usually limited to handling only one component of the process, which can introduce risk and inefficiencies to your practice.

BEE123 is the market leader in the BEE software industry, and we understand that transitioning to a new system can prove daunting. This is why our well-supported solution for Verification Agencies is crafted to help with your entire verification process and to deliver absolute peace of mind.

A smooth implementation makes all the difference to the user acceptance experience. At BEE123, we believe in being there for you. In addition to our technical skill set, you'll be assisted by the experienced team that actually built the software. Not to mention, we have a number of former verification analysts, including technical signatories, on staff.

Choose BEE123's Verification software as a plug-in to the greater BEE123 Ecosystem – or use it as a standalone offering. You'll be impressed by the seamless capabilities the system offers, regardless of whether your own clients already use the BEE123 software, or not.

BEE123 FOR VERIFICATION AGENCIES

A WEB-BASED PLATFORM

Our user-friendly web-based platform enables digital access from anywhere – making it easy, efficient and highly flexible for both agency and client users.

AN END-TO END SYSTEM

Ours is an end-to-end system that spans the entire verification process, from planning through management to tracking and reporting.

INCLUSION OF CODES AND SECTOR CHARTERS

Our software is constantly updated for legislative changes and amendments, practice notes, and interpretations.

PURPOSE-BUILT FLEXIBILITY

Our software caters for different systems and methodologies. You can custom-create your own process flow and verification methodology, reports and certificates.

SMART USER ALLOCATION

System access is highly segmented, the software ensures that whoever is assigned to perform verifications has the necessary qualifications and skill set, and our system aligns pipeline management and task allocation with analysts' capacity.

VISIBILITY, TRANSPARENCY AND INTEGRITY

Our user-friendly web-based platform enables digital access from anywhere – making it easy, efficient and highly flexible for both agency and client users.

EASY INTERNAL AUDITING

There is a comprehensive audit manual and a real-time management system (with scorecard management view, personnel management view, and more).

DIGITAL DATA AND DOCUMENT STORAGE

When storing client information and records, we prioritise accessibility and compliance – making it easier for you to audit clients or be audited by SANAS.

UP-TO-THE-MINUTE SECURITY

Our software offers consummate security to international security standards and in line with leading protocols, including the Protection of Personal Information Act.

INTERNATIONAL SECURITY STANDARDS

Aligned with international security standards

ENSURE COMPLIANCE AND MITIGATE RISK

Aligned with SANAS compliance requirements, an exceptional risk-mitigator.

SUPPORT AND TRAINING

Incredibly well-supported, complemented by superb training and audit assistance

INTEGRATES SEAMLESSLY, OR USE AS A STAND-ALONE

BEE123 Client Software integrates seamlessly with our Software for Verification Agencies. However, should your clients not be using BEE123 Software, the Verification software can function as a standalone.

END-TO-END SOFTWARE FUNCTIONALITIES

- ✓ A fully functional audit manual
- ✓ Real-time data
- ✓ Verification planner and progress tracker
- ✓ Personnel allocation
- ✓ Role allocation and segmentation
